Running Boards, Colored Running Board Mats and Fender Beading

Since the cost of original German parts is climbing out of pocket book range for most of us, we have stepped forward and reproduced another original quality replacement part to help keep your restoration project affordable and enjoyable.

Our newest addition to our growing line of quality restoration parts is our "German quality" running boards.

Our running boards are heavy stamped steel, contoured correctly and include our own manufacture running board mat made in the U.S.A. We can offer you our original quality running boards for less than the German reproductions.

While on the subject of running boards, here is an exciting new item for 1960 through 1969 Beetles... "Original style colored running board mats." Contrary to popular belief, most Beetles made in the 60's did not come with black running board mats. The 60's were colorful, exciting years with many innovations in the automotive industry. VW followed this trend towards "color" by shipping their new export model Beetles with colored running board mats. The running board mats did not always match the paint color of the cars body. They were actually a different accent color which complemented the cars paint scheme.

We have produced 3 of the more common colors: Satin Blue, Sand Beige, and Turquoise with possible color additions in the future.

Another interesting item for 1960-1969 Beetles is our original style fender beading. The only Beetles shipped with black fender beading in the U.S. were black cars. All U.S. import Beetles had fender beading that matched the paint color of the car.

We have produced 4 common colors. Pearl White, Turquoise, Gulf Blue, and Sand Beige. Next time you attend a local VW show, check out the 1960 and later Beetles. You will notice very few have colored fender beading or running board mats.

Yes, you can now buy an original quality deluxe or European bumper assembly for your 1953-1967 Beetle. We have produced a triple plated chrome bumper which rivals original German quality. Our bumpers are not anything like the imported bumpers available through other restoration shops. Our bumpers achieve a fit and finish that is nicer than a re-chromed original. The overrider tubes mate flush to the bumper blade just like the original German (no ugly black grommets in-between).

Front **\$257.90** Rear **\$275.00**

Cocoa Floor Mats

We found this material in a warehouse that was an original manufacture in the 1960's.

These are sewn in house using black vinyl binding.

This particular material has been coated with a rubber backing that has slightly aged (the rubber is checked).
